WORK SAFER WITHOUT FOGGING-UP

Ref. 914230

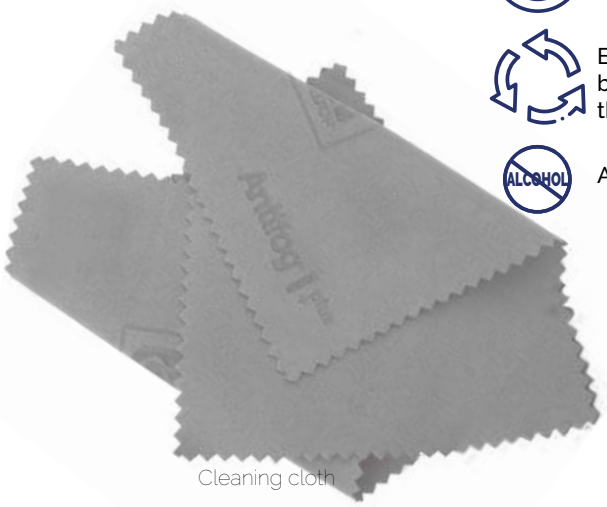

More than 12 hours of continuous anti-fogging effect

Each cloth can be used more than 300 times

Alcohol-free

Pack

Cleaning cloth

EYEWEAR ACCESSORIES
DESCRIPTION AND COMPOSITION:

The Antifog plus cloth **prevents fogging of all types of lenses**. It is manufactured from a **70% polyester and 30% polyamide** fabric blend. Its **250 g/m² fabric weight** gives the cloth greater consistency.

Each cloth is 15x18 cm in size so that both large surfaces and small objects can be cleaned easily.

It provides an anti-fogging effect on all types of neutral lenses (non-prescription). In the case of prescription lenses, these should include the Antifog coating for optimal anti-fogging results, since this cloth will activate the Antifog coated prescription lenses.

It can be used on other types of surfaces, not only with safety eyewear and visors, but also with ordinary glasses (also sunglasses) and other items such as protective panels, computer and mobile phone screens, camera lenses and helmets.

The use of this cloth makes it safer to work in places where **temperature changes or over-exertion lead to perspiration**, in jobs where **steam emissions** are present and when **eye and respiratory protection are worn at the same time**.

EASY TO APPLY

For optimal anti-fogging results, follow these steps:

1- **Pre-clean the surface** to be treated with a cleaning product and a regular cloth.

2- **Let dry.**

3- Then use the Antifog plus **cloth to rub the entire surface evenly**. If you leave areas unrubbed or do not evenly rub them, some areas may become slightly fogged. This can be solved by rubbing the cloth over the surface again.

4- Once finished, **always store the cleaning cloth in its original packaging**.

USE AND STORAGE

It is important to **store the cloth in its original packaging** (plastic ziplock bag) after use to ensure the cloth lasts as long as possible. **Only use this cloth as an anti-fogging agent**, not to clean your glasses. **Please note that it cannot be washed**, so using it as a cleaning cloth will shorten its service life as an anti-fogging cloth.

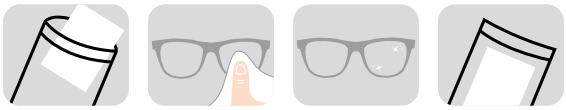

Antifog plus stays effective throughout its period of use, even if the surface the Antifog Plus was applied to becomes wet, whether immersed or simply splashed with a bit of water.

ACCESSORIES
EYE PROTECTION

914230	Cleaning cloth Antifog plus

COMPONENTS AND WARNINGS	
Components	Textile: 250 g/m², 70% Polyester + 30% Polyamide Anti-fogging ingredients: Surfactant Alcohol-free.
Safety precautions	Keep out of reach of children

COMPONENTS	
Silicone	Present

OTHER FEATURES	
Method of use Uses	Pre-clean the surface to be treated, let it dry. Then, wipe the cloth over the entire surface evenly. Once finished, store the cleaning cloth in its original packaging.  Suitable for use on multiple surfaces: spectacles, visors, computer and mobile phone screens, camera lenses, helmets, etc.:  It provides an anti-fogging effect on all types of neutral lenses (non-prescription). In the case of prescription lenses, these should include the Antifog coating for optimal anti-fogging results, since this cloth will activate the Antifog coated prescription lenses. PLEASE NOTE: When using for the first time, test to ensure that the surface to be treated does not react to any of the spray's ingredients. Pre-coated prescription lenses are especially prone to damage; for this type of lens we recommend using one of the Medop sprays instead of this cloth.
Uses	Essential for caring for spectacles. Especially recommended for work in hot environments or that combine different temperatures, as well as when wearing combined eye and respiratory protection. In general, any job where conditions cause lenses to fog up, with the consequent reduced visibility. Sectors: ovens, cold stores, laundries, cleaning, food, chemicals, logistics, maintenance, forklifts, offices, etc.
Conservation	Do not wash. Store at a temperature between 5 and 55°C. Store in its original packaging when not in use.
Presentation	Each anti-fogging cloth comes individually packaged. 50 Clothes/Box - 24 Boxes/Carton
